Menus and buttons are larger and touch-friendly

Menus and buttons are larger and touch-friendly.

Some features are hidden inside the Menu to save screen space.

4. The layout uses multiple columns, including left and right sidebars.

More shortcuts, groups, and contacts are visible at the same time.

Navigation is spread across the top of the page.

More content can be displayed on a single screen without scrolling.

Features such as chat, notifications, and shortcuts are easier to access simultaneously.

5. The interface is clean and organized.

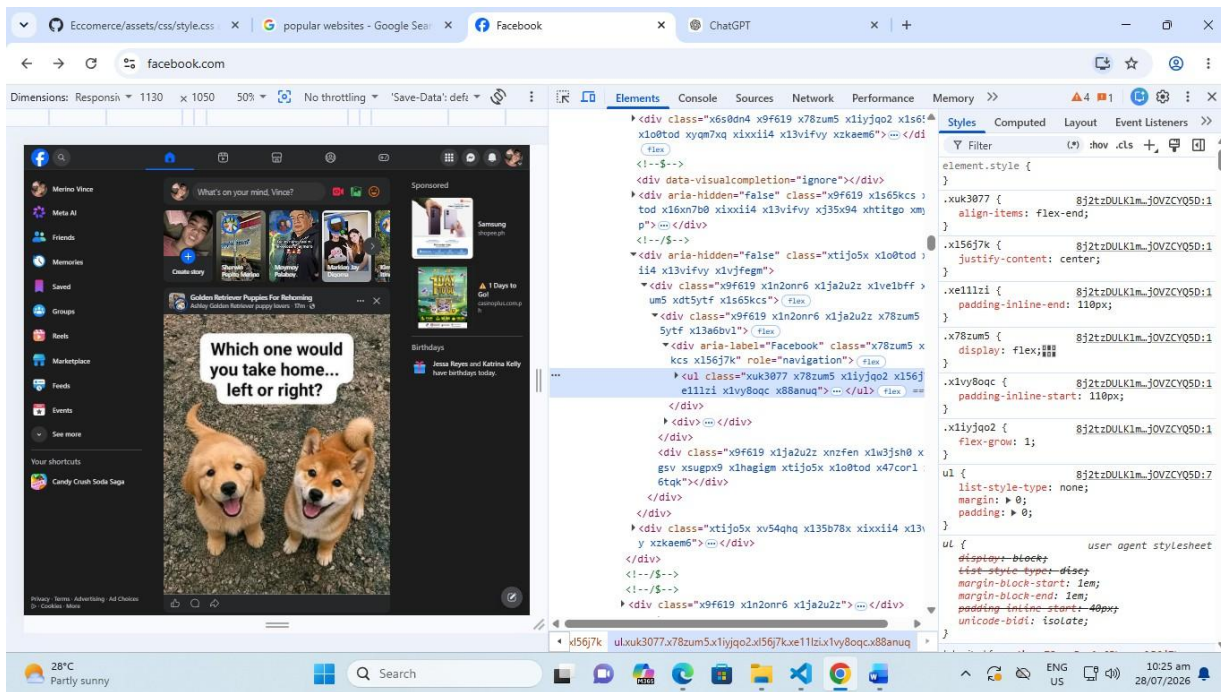

It is easy to navigate on both mobile and desktop.

The responsive design provides a consistent user experience across devices.

Icons and buttons are simple and recognizable.

The news feed is easy to read, and images and videos are displayed clearly.
